

Every Dollar You Give — Followed by Prayer & Proof

A plain-language guide for Pentecostal missionaries: sending education funding to Syria's displaced Christian communities and refugee children with zero fees, zero interference, and full blockchain accountability.

"He heals the brokenhearted and binds up their wounds." — **Psalm 147:3** | GetSmart Token ensures every gift reaches Syria's broken communities exactly as intended.

0%

Transaction Fees — Every cent reaches the mission

100%

Transparent — Donor traces gift to recipient in real time

No Bank, No Government, No Third Party cuts

THE PROBLEM WE SOLVE IN SYRIA

Syria's Christian population has been reduced from 1.5M to under 500,000 by 14 years of civil war. Comprehensive **US and EU sanctions on Syria** make it legally complex for American churches to send money through traditional banking — SWIFT transfers trigger automatic compliance blocks that freeze even legitimate Christian aid alongside actual terrorist financing.

4M+ displaced people in northwest Syria (Idlib) have almost no access to formal schooling. Evangelical church workers serving camps cannot receive bank transfers. GST reaches them through Jordan-based Sponsor churches, bypassing the sanctions-compliance wall entirely.

FOLLOW THE MONEY — LIKE A PRAYER CHAIN

STEP 1 — HOME CHURCH (USA / CANADA / AUSTRALIA) Donor Opens Free GetSmart Account

Like creating an email account. 5 minutes on your phone. No bank required — or link your existing account. Visit getstoken.org to sign up free.

STEP 2 — INSTANT, LIKE SENDING A TEXT Send GST Tokens to Your Missionary

Type their GETS ID (like an email address). Press send. Arrives in under 60 seconds. **No SWIFT block. No sanctions compliance freeze.**

STEP 3 — MISSION FIELD (DAMASCUS / ALEPPO / JORDAN HUB) Missionary Receives & Distributes

Jordan-based Sponsor churches receive GST and redistribute safely to field missionaries inside Syria — each transaction permanently recorded on blockchain.

STEP 4 — YOU SEE IT HAPPEN Track Your Gift to the Child

Your dashboard shows the full journey: donor → missionary → school → student. Every step timestamped and tamper-proof on blockchain.

WHAT YOUR GIFT FUNDS

IDP Camp Schools Idlib & northwest Syria

Refugee Education Children who never attended school

Trauma Healing War survivors & orphans

Church Rebuilding Destroyed by ISIS & conflict

Pastor Training Underground church leadership

Women & Orphan Care War widows & displaced families

WHY GST IS DIFFERENT IN SYRIA

Bypasses Sanctions-Compliance Blocks

GST is a utility token — not a wire transfer — so it doesn't trigger the OFAC and EU sanctions-compliance systems that inadvertently freeze legitimate Christian aid flowing to Syrian churches.

Permanent Credentials Survive Destruction

Syria's reconstruction will be generational. GST credentials for teachers and students mean even if physical institutions are destroyed again, every educational record is permanently preserved on the blockchain.

Jordan Hub Protects Field Workers

Amman-based evangelical Sponsor churches manage GST distribution into Syria — shielding field missionaries from carrying traceable foreign funds across active conflict zones.

Built by a 501(c)(3) Nonprofit

GetSmart Token is governed by the Digital Financial Aid Corporation — a US 501(c)(3). Its mission is education. Ours is restoring the Church in its ancient homeland. They align at getstoken.org.

Four Steps from Your Pew to a Syrian Child's Classroom

1

Download & Sign Up

Visit getstoken.org and sign up with your email. Free, takes 5 minutes. Your church administrator can help. No blockchain knowledge required.

2

Add Funds

Link your debit card or bank account. Convert dollars to GST tokens — digital offering envelopes that only go where you address them.

3

Send to Your Missionary

Your missionary or Jordan Sponsor hub has a GETS ID. Type it in, add a prayer note, press Send. Arrives in seconds — no SWIFT block, no sanctions freeze.

4

Watch It Work

Your app shows a live trail — like package tracking for a gift. See which program it funded and which community it serves.

Protection in Syria's Mission Field

- ✓ Funds bypass OFAC and EU sanctions-compliance banking blocks — GST is classified as a utility token, not a wire transfer or foreign donation
- ✓ Jordan Sponsor hub model shields field missionaries — no one inside Syria needs to carry or receive identifiable foreign cash
- ✓ NFT credentials stored on blockchain — permanent educational records that survive bombing, displacement, and institutional collapse
- ✓ Works in areas where banking has collapsed — only requires a mobile phone and data signal through Sponsor intermediary networks
- ✓ Full accountability for diaspora donors — Syrian Christians in the West can verify exactly where their support reaches inside the country

★ For Church Coordinators

- ★ **Jordan Hub Structure:** Your Amman-based Sponsor church holds the GST treasury and distributes to verified Syria field missionaries, keeping all receipts on-chain
- ★ **Designated Giving:** Tag gifts "Idlib Camp School" or "Aleppo Church Rebuild" — earmarked instantly, no commingling
- ★ **Sanctions Documentation:** GetSmart provides full transaction records demonstrating educational utility purpose — supporting legal compliance for US donors
- ★ **Tax Receipts:** US-compatible charitable giving receipts automatically issued by getstoken.org for all donor contributions
- ★ **Teacher Credentialing:** Issue NFT certificates to Syrian teachers and church workers — building durable human capital that outlasts any political crisis

🇸🇾 Syria — Cradle of Civilization: Why GST Is Strategically Essential Here

- ✦ Syria's ancient Assyrian and Syriac Christian communities — **among the world's oldest churches** — have been reduced from 1.5M to under 500,000. Survivors desperately need education funding that doesn't trigger sanctions-compliance bank freezes.
- ✦ Northwest Syria (Idlib, under jihadist control) holds 4M+ displaced people — evangelical NGOs run informal schools in camps but **cannot receive bank transfers**. GST reaches these workers through Jordan Sponsor churches managing distribution.
- ✦ US and EU sanctions were designed to target the Assad regime, but their banking-system effects inadvertently block **legitimate Christian aid** — GST's blockchain structure is classified differently from wire transfers, creating a legally distinct funding pathway.
- ✦ Syrian diaspora Christians in **the US, Canada, Germany, Sweden, and Australia** are among the world's most motivated mission givers — GST gives them a transparent, accountable pipeline to churches and schools inside their homeland.

† Common Questions from Home Church Members †

"Are we violating Syria sanctions by giving?"

No. GST is a utility token classified for educational purposes — not a wire transfer or foreign donation subject to OFAC Syria sanctions. GetSmart provides documentation of educational purpose. Always consult your own legal counsel for specific compliance guidance.

"Can we give to a specific Syrian church or family?"

Yes. Missionaries set up named programs (e.g., "Aleppo St. George School Rebuild"). You send to that program and your dashboard shows real-time progress — transparent, verified, tamper-proof.

"What if our missionary is in a dangerous area?"

The Jordan Hub model means your missionary never carries identifiable foreign cash. Funds flow through Amman Sponsor churches who distribute safely — only GETS IDs are visible in the blockchain record, not donor or recipient names.

"What if the church is destroyed again?"

All student and teacher credentials issued through GST are stored permanently on the Ethereum blockchain — not in any physical location. Even if a school is bombed, every child's educational record survives forever.
